OVERVIEW

As a creative full stack website and software developer, I enjoy crafting fully featured, fully functional websites and software out of nothing, and then seeing it be implemented and making an impactful difference in the day to day grind of busy and successful businesses.

I enjoy working alone or with a team, utilizing my communication skills and professional experience to rapidly churn out prime, user friendly software with advanced features and good looks.

SKILLS

While highly skilled in many cutting edge technologies, programming languages and frameworks, I am highly focused on the PHP/Laravel stack.

My back end experience includes the C# and PHP programming languages and .NET, Laravel, Drupal, NodeJS frameworks. My front end experience includes HTML, CSS, JavaScript, TailwindCSS, Bootstrap, Angular, React and much more.

I have previously integrated with marketplaces such as Amazon, eBay, Walmart and Shopify - Shipping Solutions such as ShipStation, ShipEngine, USPS, UPS, Fedex and DHL and other companies such as Sabre travel GDS, SellerCloud multichannel software and PrintNode printing software.

I have extensive experience managing virtual linux servers and MySQL databases on the AWS and Digital Ocean platforms.

EXPERIENCE

306 Digital, Spring Valley, NY - *CEO and Software Engineer*

SEPTEMBER 2020 - Present

- Developed a full-fledged shipping solution for a client, significantly speeding up and dummy-proofing their shipping workflow (PHP, Laravel, Livewire, TailwindCSS)
- Developed an internal business solution for a client, reducing hours of tedious manual work to a click of a button (PHP, Laravel, Livewire, TailwindCSS)
- Developed a smart scheduling software for a special education company, allowing them to easily schedule sessions with providers based on deep availability. (ReactJS)
- Developed a beautiful lender and loan management system for a client in the lending industry. (PHP, Laravel, Livewire, TailwindCSS)
- Developed a scraping bot for a client, replacing nonstop, repetitive tasks with automated software (NodeJS)
- Developed an alert system to monitor specific websites for specific contents and alerting the users by SMS and Email (NodeJS)
- Developed multiple user friendly responsive informational websites for various clients (HTML, CSS, TailwindCSS)

SellerGrip, Mahwah, NJ - *Full Stack Software Engineer*

SEPTEMBER 2019 - SEPTEMBER 2020

- Completely revamped the user interface for this multichannel e-commerce software to a responsive, user friendly design (HTML, CSS, TailwindCSS, JavaScript, jQuery, PHP, Codeigniter)
- Built the marketing website at sellergrip.com (HTML, CSS, TailwindCSS)
- Added new features and integrations such as Shopify (PHP, Codeigniter)

Maven Software, Monsey, NY - *Full Stack Software Engineer*

JULY 2017 - SEPTEMBER 2019

- Led the development of an internal inventory and printing software for a client (C#, .NET, Angular)
- Helped build a financial reporting software for e-commerce businesses called ConnectBooks (C#, .NET, Angular)
- Built a new back-end for a commercial music software for a client (PHP, Laravel)
- Helped build a transportation & logistics software for a client (C#, .NET, Angular)
- Developed multiple user friendly responsive informational websites for various clients (HTML, CSS, JavaScript, Angular, WordPress)

Do All Travel, Brooklyn, NY - *Full Stack Software Engineer*

MARCH 2016 - MARCH 2020

- Extracted useful components from an old, unuseful software, using it to build a new flight booking engine called Wingling (HTML, CSS, JavaScript, jQuery, AngularJS, PHP, Drupal)
- Built a flight booking website on top of the Wingling engine at doalltravel.com (HTML, CSS, JavaScript, jQuery, AngularJS, PHP, Drupal)
- Maintained the Wingling engine

B&H Photo Video, New York, NY - *Front End and Drupal Developer*

DECEMBER 2013 - MARCH 2016

- Worked alongside the B&H frontend team to facilitate new features and redesigns of the B&H website (HTML, CSS, JavaScript, jQuery)
- Worked on the Explora blog site, adding new features and functionality (PHP, Drupal)
